

Observations

Multi-Unit Housing (MUH)

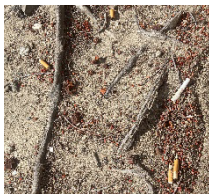

Fifty Smoke-free Multi-Unit Housing Observations were collected in the city of Cypress. The goal of this observation survey is to use the data collected to empower the local community to take action toward ending tobacco use in their area. The data were collected from October 31, 2023 to January 2, 2025. Observations were conducted between 10:00 AM and 11:50 PM, lasting an average of 22 minutes. The weather was sunny, misty, and cold, with temperatures ranging between 70°F and 79°F. The data were analyzed, and the results are reported below.
